

How To:

Submit Work to Assignments

The Assignments tool area has folders where you submit work to your teacher. Each activity has a separate folder.

Step 1: Select the Assignments link on the Nav Bar under 'My Class' and find the folder specifically labelled for the activity you are working on.

Step 2: Select **Add a File**.

Step 3: Drag and drop your file or choose **Upload** (if you choose upload, browse to find the file, select it, choose open). You can also upload directly from Google Drive instead of your computer once you've connected your Google account through the integration.

Step 4: Choose **Done**.

Step 5: Add comments if you wish (you must have a file uploaded to be able to use the comments area); then select **Submit**.

- Once your assignment has been submitted, you will receive an automatic email receipt through the email tool in the Core indicating that your work was successfully uploaded.
- Your teacher will post feedback in the Assignment folder when he/she has viewed it. You find that by clicking on Assignments in the Nav Bar or under the Updates widget on the Course Home page. You will see '**unread**' or '**read**' in your assignments list under evaluation status.

Tip: If you need to submit a link such as to a website, Prezi or Youtube upload, paste it in the comments area, and then upload a file such as your source list or rough work to make the Assignment folder work.

Assignments Hel

[View History](#)

Assignment	Completion Status	Score	Evaluation Status
Unit 1			
Activity 2 - Assignment	1 Submission, 1 File	- / -	Feedback: Read
Activity 4 - Assignment	6 Submissions, 6 Files	- / -	

Check the 'Tips for Success' page to see what formats your teacher can open. Any word processor will allow you to save a file in a few different formats.

Adobe Acrobat (PDF) can be viewed the most easily in the Core in both the Assignments and Discussions and saves your formatting better than Rich Text Format (rtf). See the video about changing work to PDF for programs other than Google Drive, or the video about GAFE for help with converting your Drive files to PDF.

Name that file!

Always save your file on your computer or in your google drive before uploading it using this specific pattern:

First name Last name - Course - [Module # OR Unit # - Activity # - Assignment #] .extension (file type)

Example: YourName-MFM1P-M1.docx OR YourName-ENG3U-U1A1A3.pdf
