

How To:

Google Meet with a Code

You need to be logged in to your school Google account to connect to Google Meets with your class if you are with AMDSB.

Go to Google Meet (<https://meet.google.com/>) or use the App picker (waffle) in the top right of any of your Google pages to select the Meet icon.

Click on 'Use a Meeting Code'

Type or paste in the nickname/code your teacher has provided into the enter meet code box

Click on continue

Select 'join now'

Another way you may be asked to go to a Google Meet is by an email invitation. Check the email carefully for a link that you need to click to join.

If you are a student from outside AMDSB, you will need to get a link from your teacher in order to join directly if the nickname doesn't work.
